REPIXY
LIGHTROOM PRESETS

GUIDE TO INSTALL REPIXY LIGHTROOM PRESETS DESKTOP
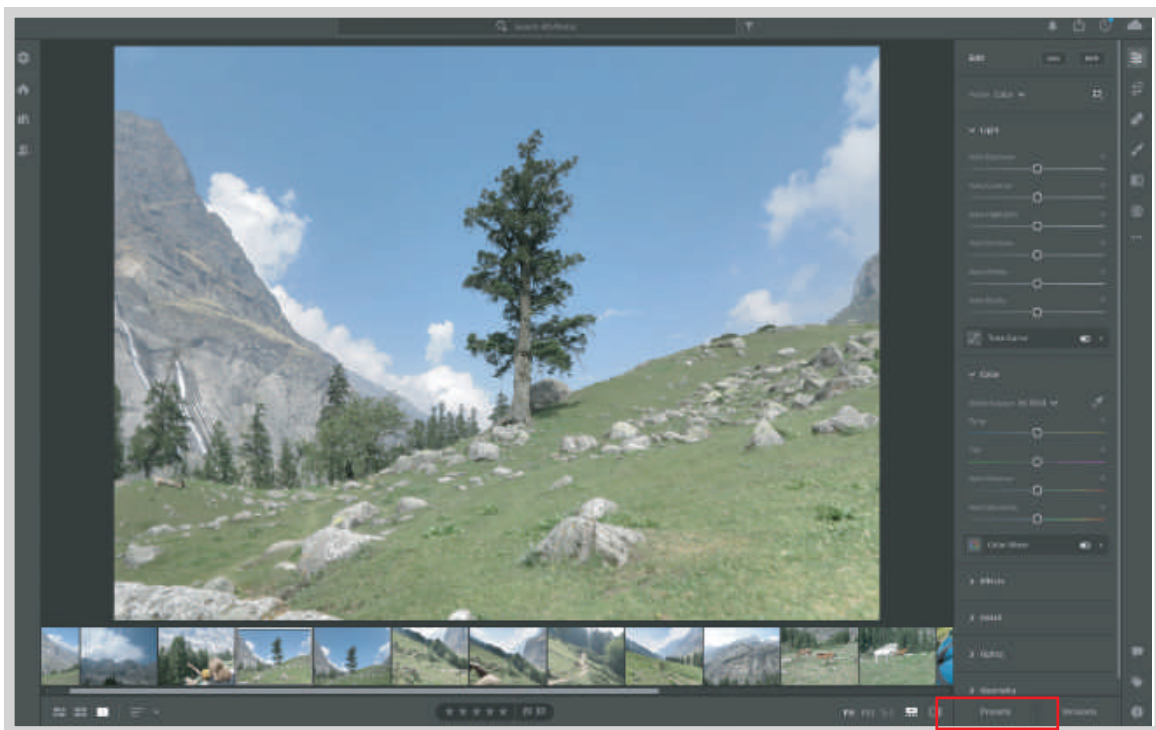

REPIXY

STEP 1: Open lightroom and select a photo by double-clicking a photo from the photo grid.

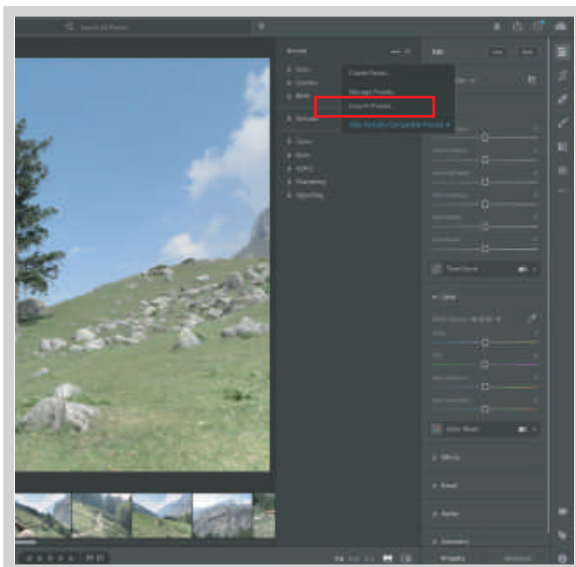

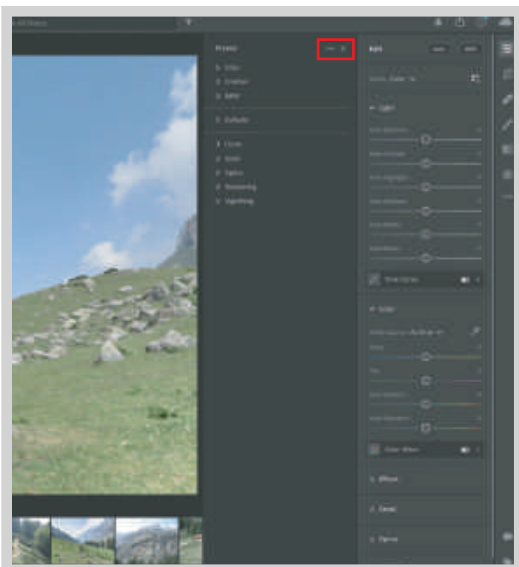

STEP 2: Then click on the Edit icon in the pane on the right side or press E-key on the keyboard to go into the Editing workspace.
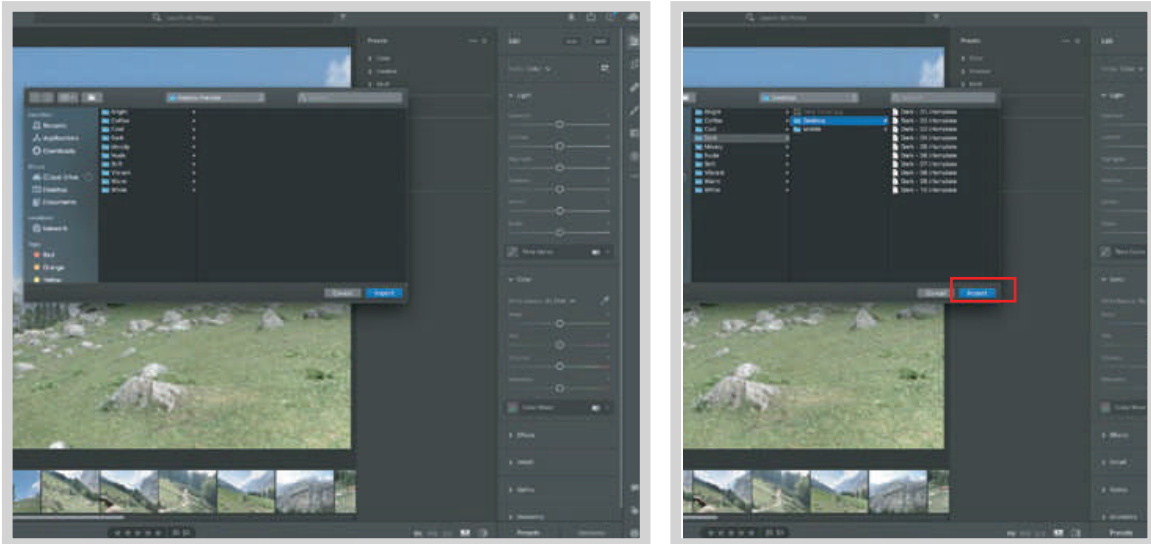

**STEP 3:** Next, click on the Presets button under the Editing workspace.

STEP 4: To import a preset click on ... icon and select Import Presets.

STEP 5: This will bring up a file where you can navigate the files in your computer and find the preset files you would like to import.

STEP 6: The imported Presets would appear in the Preset panel. Now you can use them with a single click!

IT'S ONE THING TO MAKE
A PICTURE OF WHAT A
PERSON LOOKS LIKE,
IT'S ANOTHER THING TO
MAKE A PORTRAIT OF
WHO THEY ARE.

— *Paul Caponigro*
